## mission

To accelerate the flow of finance towards the highest quality carbon projects of the future. Expediting the process of project origination, decision making, due-diligence and term-sheet negotiation for buyers and investors.

## why us?

Our breadth of experience in carbon markets and structuring long term commodity trades, and our extensive global network of project developers and investors.

# ***the problem***

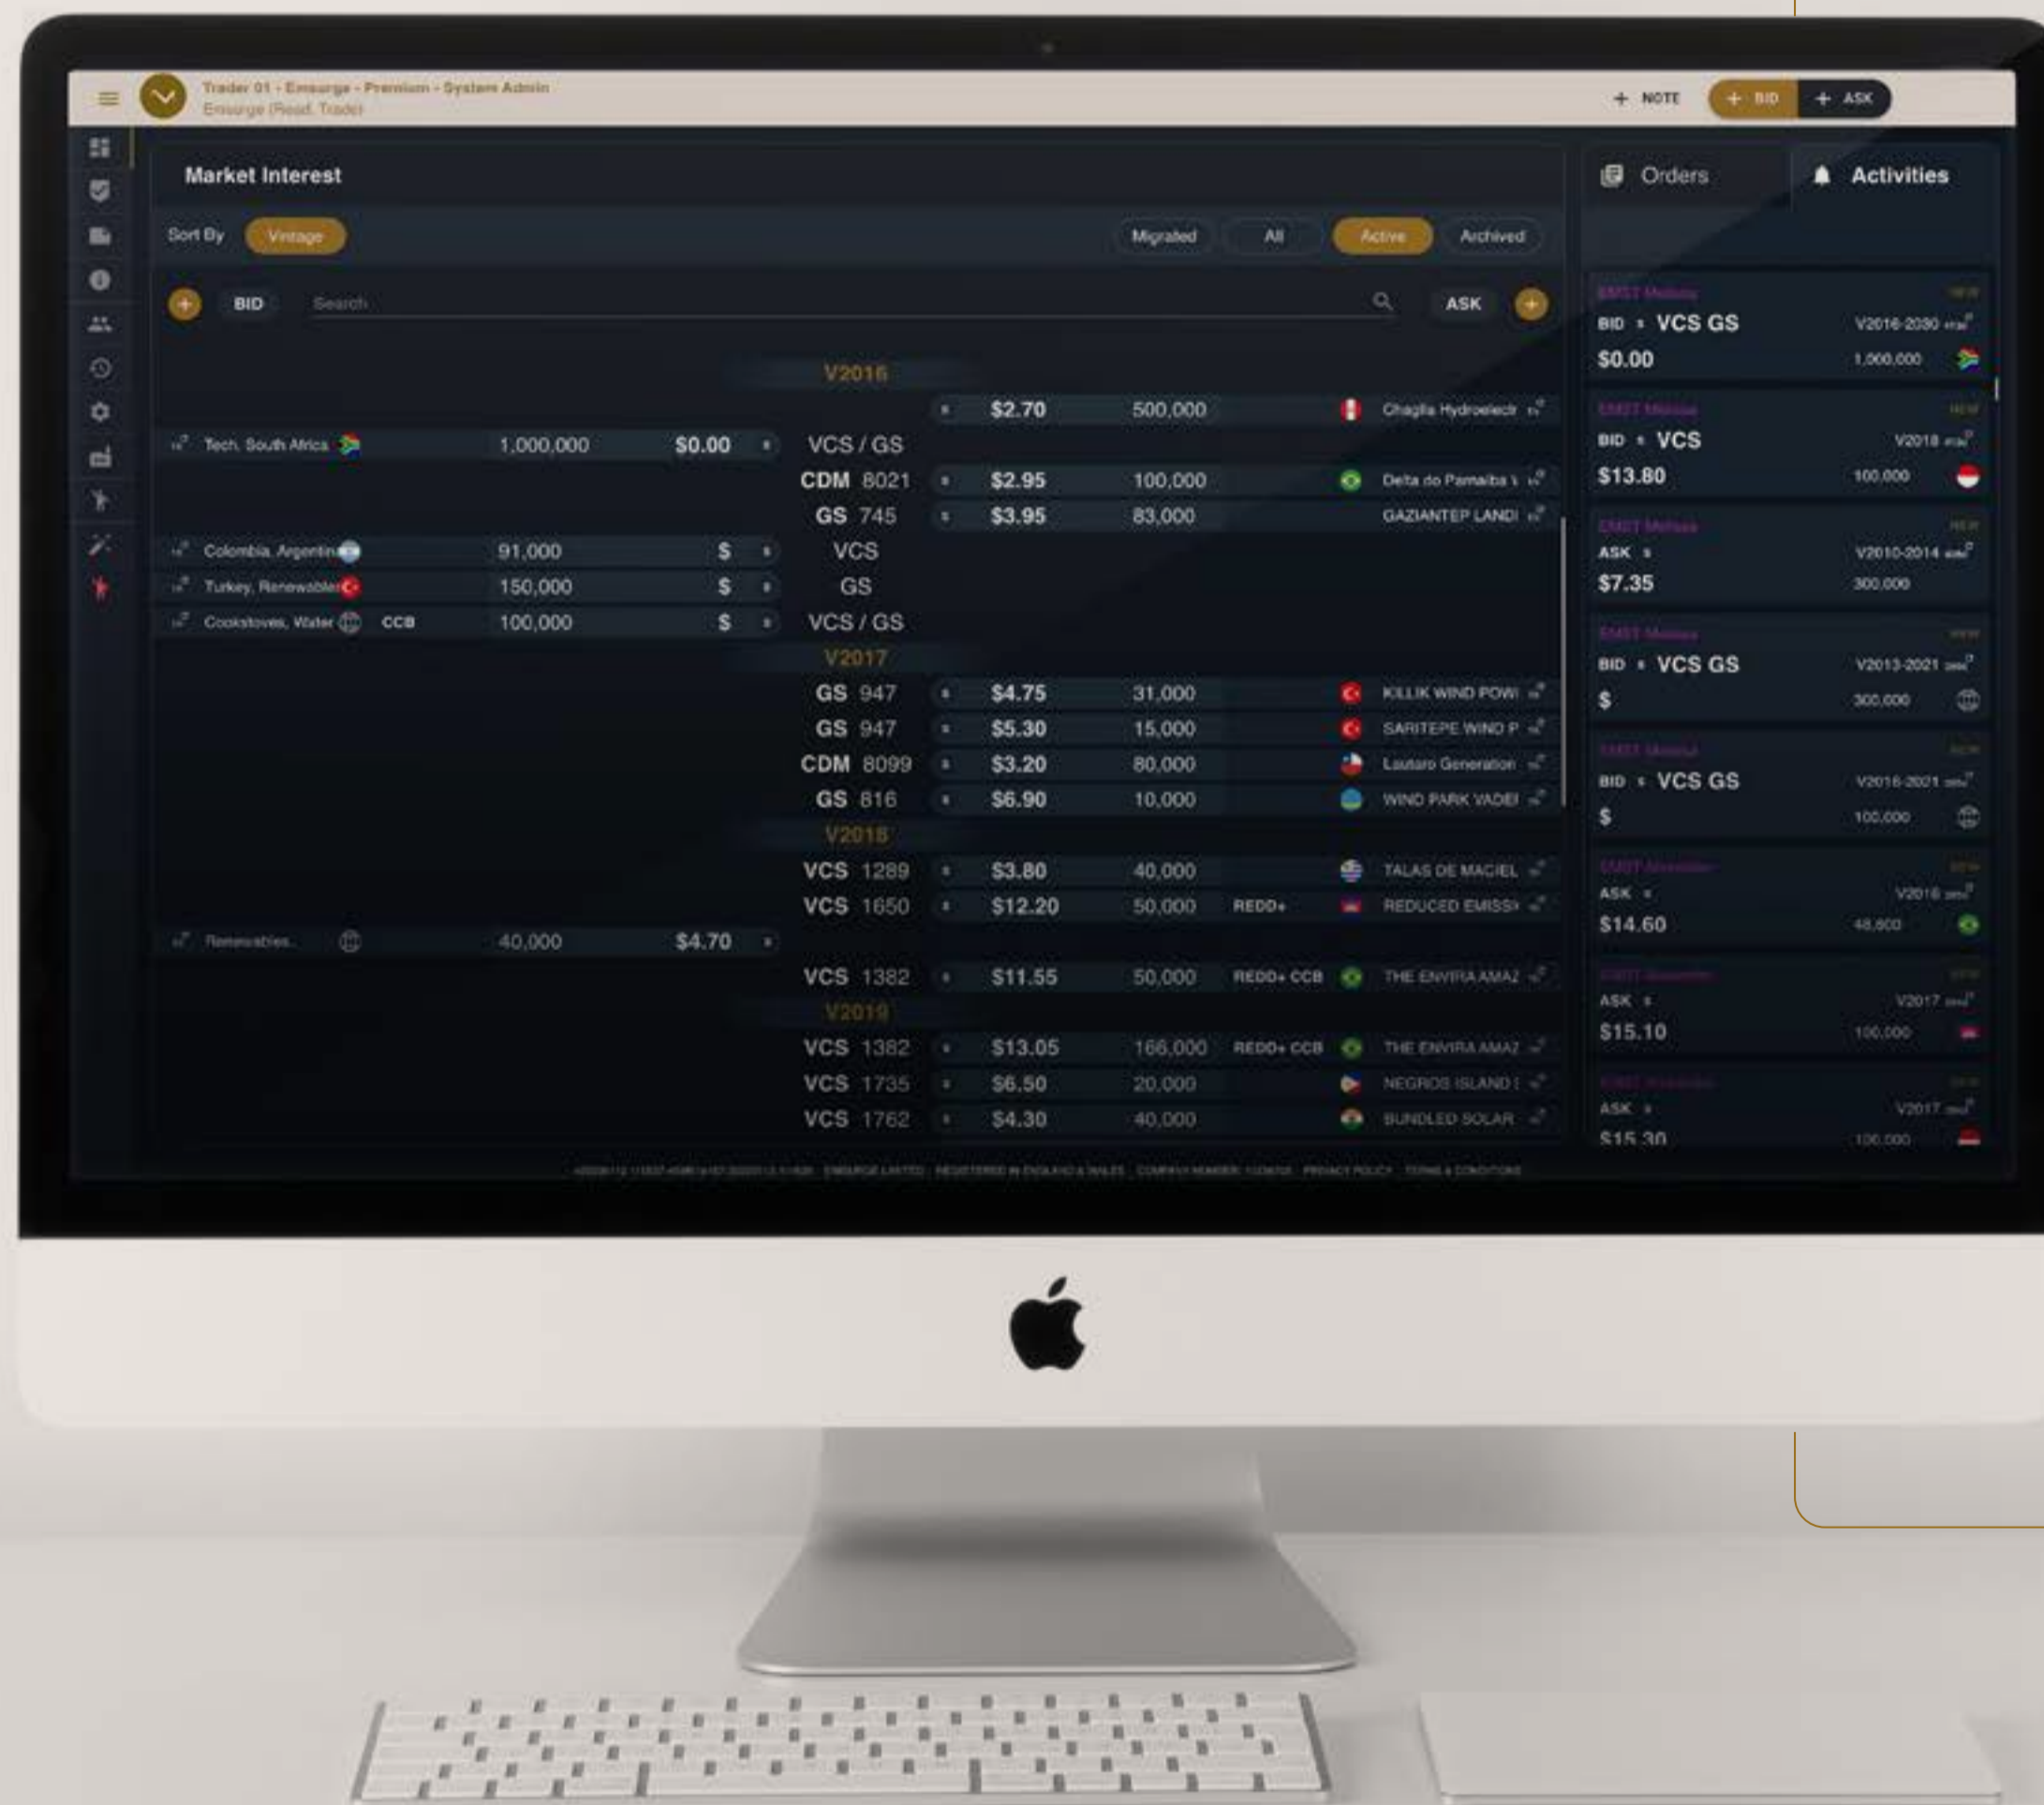

The carbon markets are complex, highly proliferated and dynamic.

It requires experience and expendable internal resources to make an informed investment into the Verified Carbon Market.

While experts in their field, many carbon project developers lack the internal resources and network to connect with investment grade buyers, or the experience structuring long term deals.

This slows the deployment of available capital into critical climate solutions.

# the how

## originate

Identify investible developers with scalable, high quality projects that generate carbon credits.

## educate

Educate and inform investors on the VCM, deal structures, relevant policy, project types, and geographies that suit their goals.

## prepare

Help project developers prepare materials necessary for a smoother investment process.

## connect

Connect project developers with investment grade buyers.

## facilitate

Mediate the process by proposing structures, negotiating terms, and facilitating an amicable solution.

# *investor support*

## *screen*

We listen, source, and shortlist projects that suit your goals based on type, size, region and impact.

## *analyse*

Disclose risks, benefits, quality, progress towards Article 6, and investment return to give you the tools necessary to make a sound investment.

## *bridge*

Connect you with high-quality project developers and support you throughout the process.

## **organising**

Organise materials into easily digestible templates. Help throughout the broking process.

## **pricing**

Provide up to date information on relevant spot and forward pricing and transactional data.

## **structuring**

Support in monetising credits already issued as well as structuring forward and multi-year ERPAs.

## **connecting**

Connect you with a wide variety of buyers and investors.

# **developer support**

VCS	Value	Price	Quantity	Structure	Project
VCS 1289	\$3.80		40,000		TALAS DE MACIEL
VCS 1650	\$12.20		50,000	REDO+	REDUCED EMISSIONS
VCS 1382	\$11.55		50,000	REDO+ CCB	THE ENVIRA AMA2
V2019					
VCS 1382	\$13.05		186,000	REDO+ CCB	THE ENVIRA AMA2
VCS 1735	\$6.50		20,000		NEGROS ISLAND
VCS 1762	\$4.30		40,000		BUNDLED SOLAR
